

CS 399: Mobile Application Development  
Summer 2020

## Homework-07

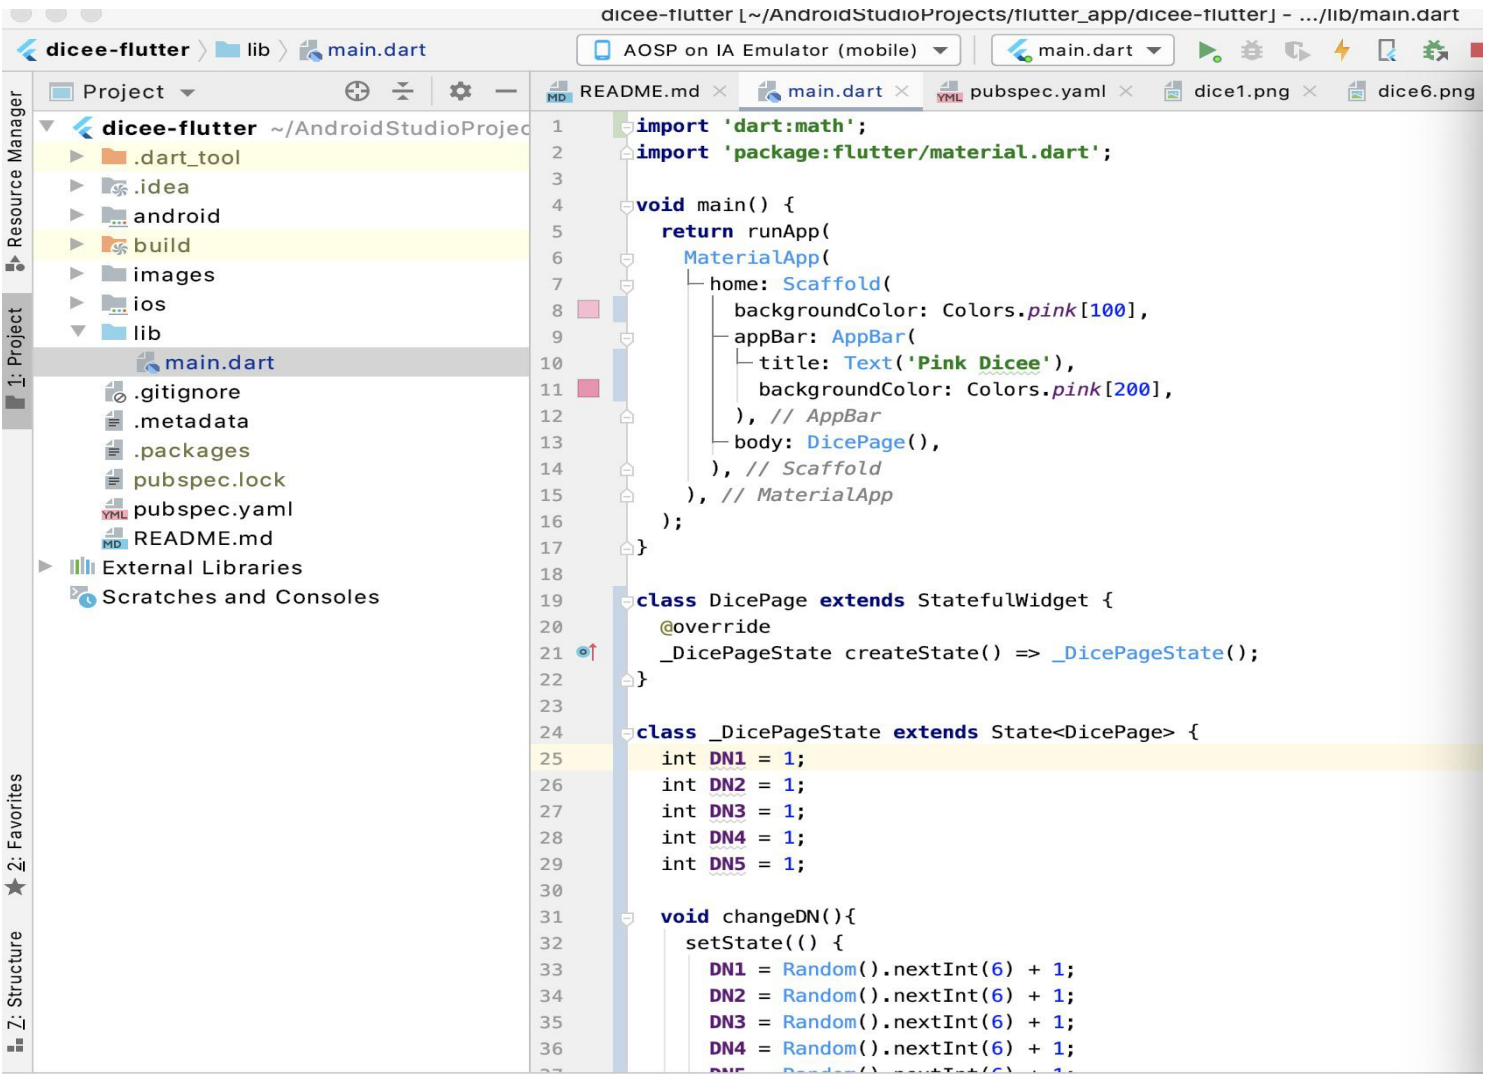

Due Wednesday June 24  
30 Points Total

Hanyue Wang

CS-399(1204-2860) SPECIAL TOPICS 002 - MOBILE  
APPLICATION DEVELOPMENT

### *Deliverables:*

- 1) Complete Android project files in a zip folder. Name your folder using the naming convention like: *lastname\_firstname\_CS399\_hw7\_Dice.ZIP*. Use **Android Studio File menu and select Export to Zip File**. Do not zip the project file directly from the project directory.
- 2) Include snapshots of the following artifacts as displayed in the Android Studio. Paste the snapshots in PDF file named *lastname\_firstname\_CS399\_hw7\_Snapshots.PDF*.
  - a. The Dart file under the *lib* directory. Expand all the code to show the complete Dart code including the *import* instructions.

```
1 import 'dart:math';
2 import 'package:flutter/material.dart';
3
4 void main() {
5   return runApp(
6     MaterialApp(
7       home: Scaffold(
8         backgroundColor: Colors.pink[100],
9         appBar: AppBar(
10          title: Text('Pink Dicee'),
11          backgroundColor: Colors.pink[200],
12        ), // AppBar
13        body: DicePage(),
14      ), // Scaffold
15    ), // MaterialApp
16  );
17 }
18
19 class DicePage extends StatefulWidget {
20   @override
21   _DicePageState createState() => _DicePageState();
22 }
23
24 class _DicePageState extends State<DicePage> {
25   int DN1 = 1;
26   int DN2 = 1;
27   int DN3 = 1;
28   int DN4 = 1;
29   int DN5 = 1;
30
31   void changedN(){
32     setState() {
33       DN1 = Random().nextInt(6) + 1;
34       DN2 = Random().nextInt(6) + 1;
35       DN3 = Random().nextInt(6) + 1;
36       DN4 = Random().nextInt(6) + 1;
37       DN5 = Random().nextInt(6) + 1;
38     }
39   }
40 }
```

87         ), // Row
88     ); // Center
89 }
90
91

```

9: Version Control | Terminal | Multi-OS Engine | Dart Analysis | 4: Run | TODO

Frameworks Detected: Android framework is detected. // Configure (today 7:12 PM)

- b. The Android Studio Project Pane showing any directories and components that you have added/changed for your application. Expand android, images, ios and lib directories to show all application components.

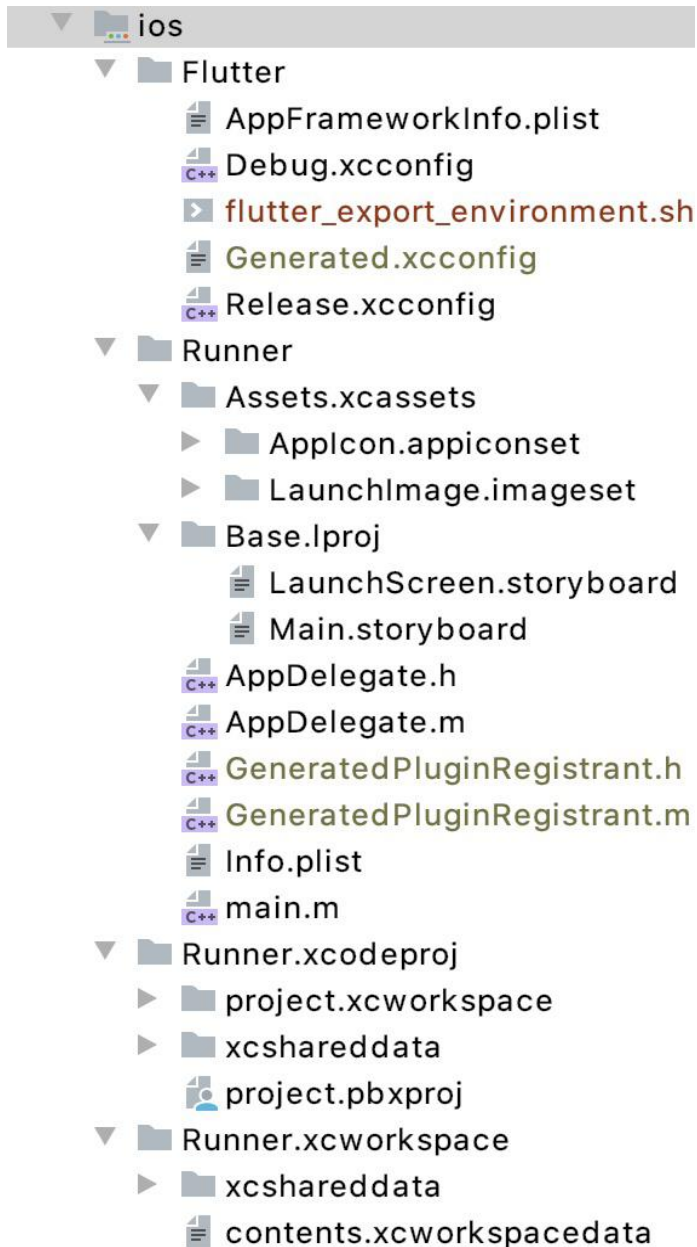

**Android:**

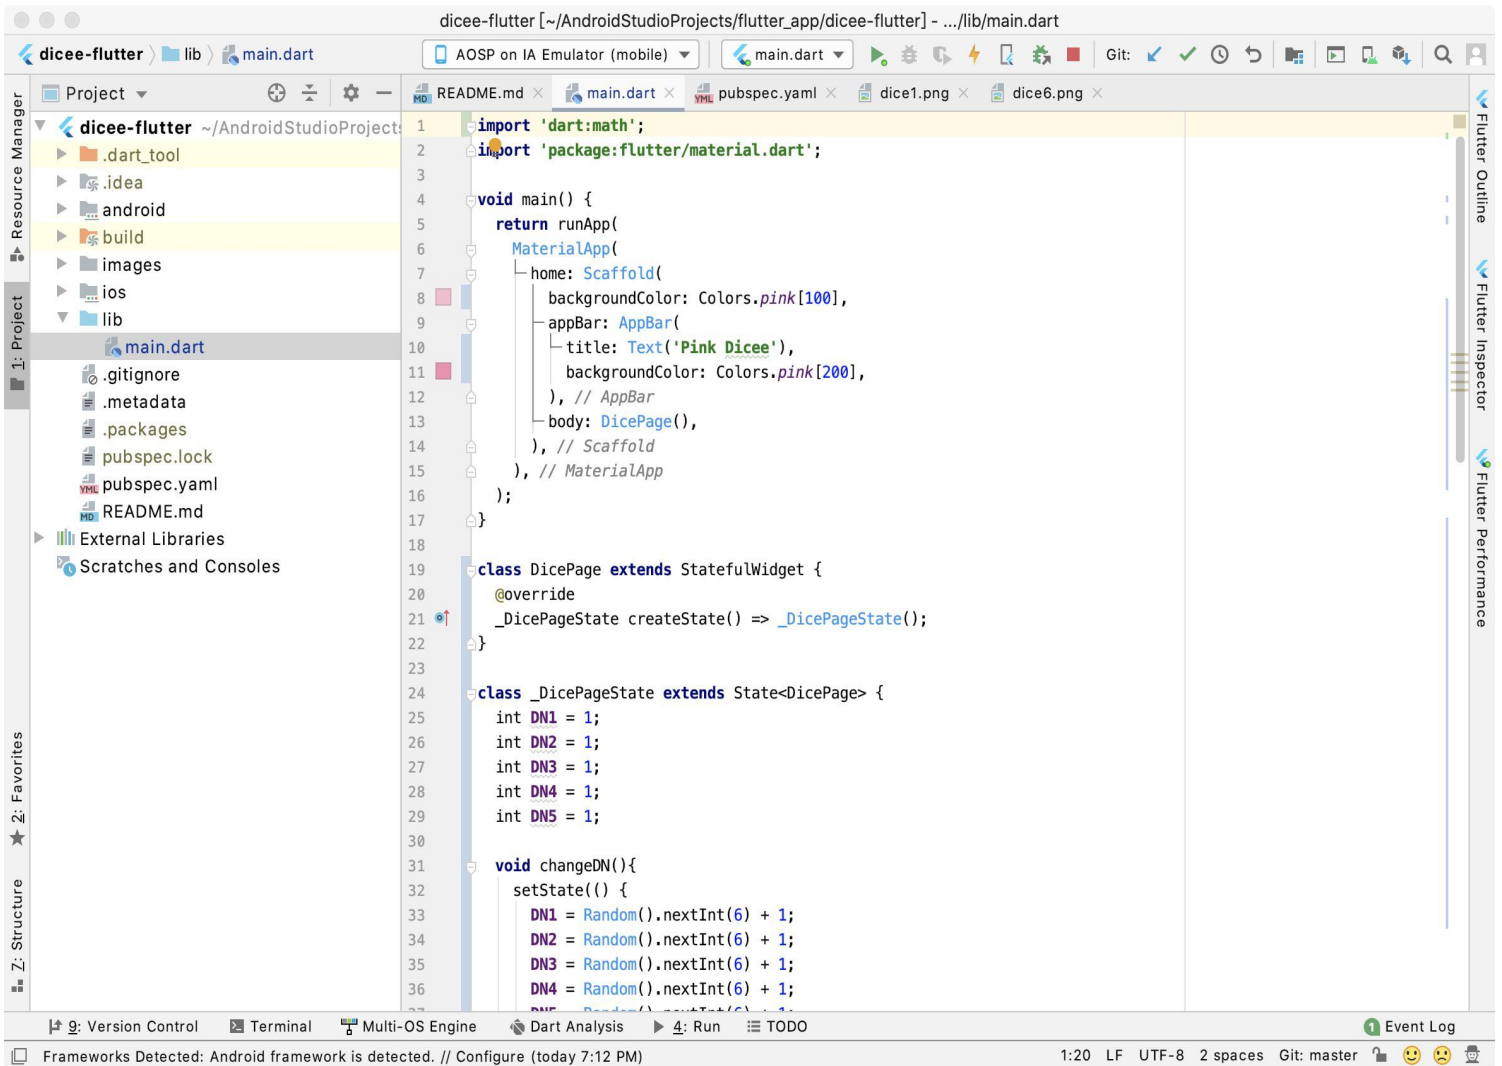

## Images:

## IOS:

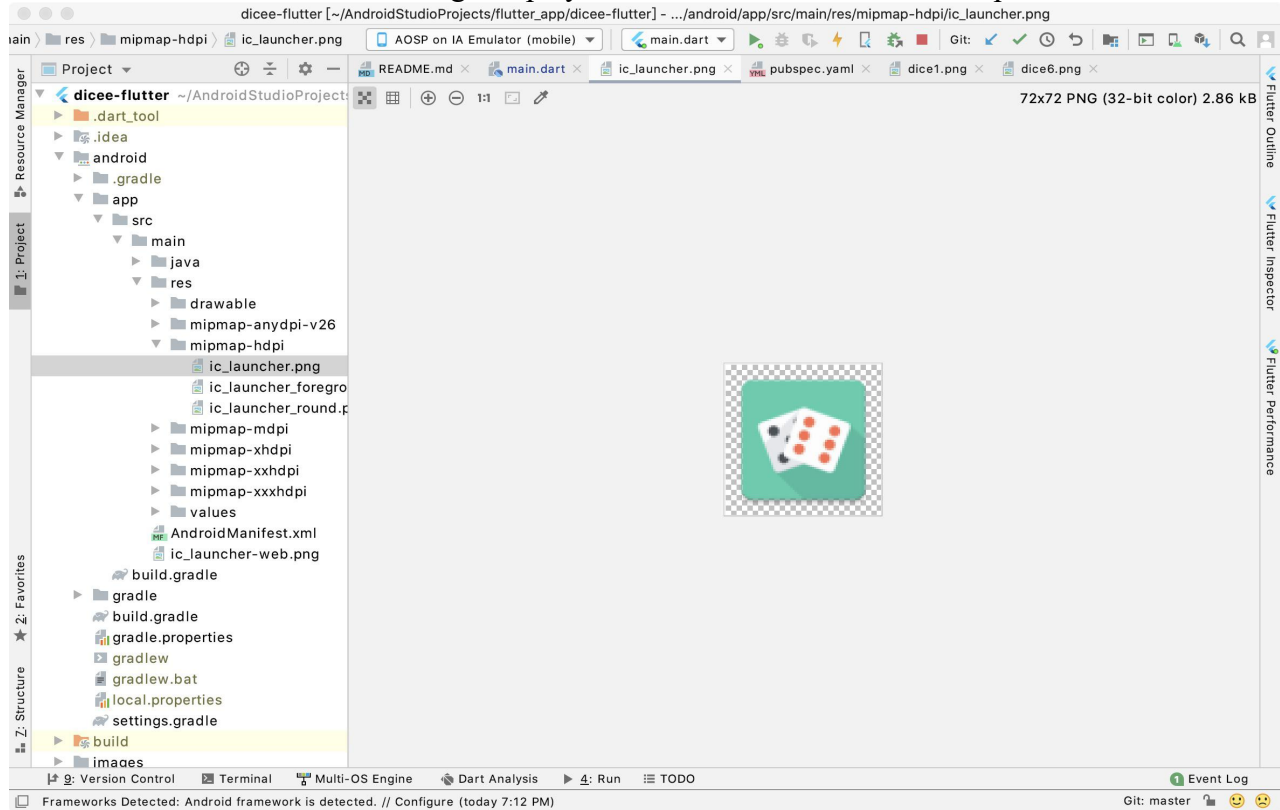

## Lib:

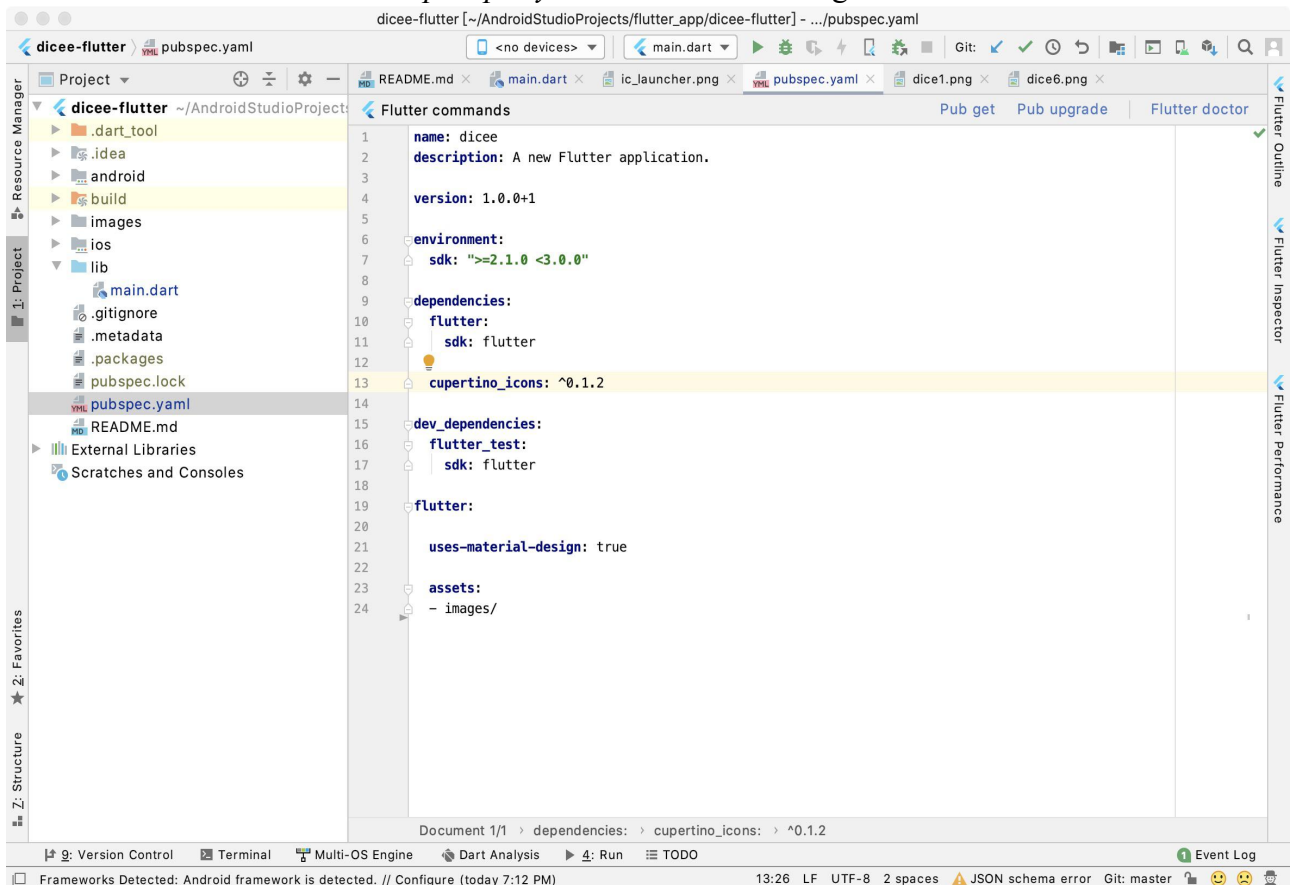

- c. Show at least one android *mipmap* image and one iOS *icon-App* image displayed in the Android Studio Editor pane.

- d. The *pubspec.yaml* file after removing all comments.

- e. View of your application when it is run on the *Pixel 2* or *Nexus 6* virtual device.

3) View of Android *Pixel 2* or *Nexus 6* home page including display of your *app icon*.
